

Week Four Wrap up!

Mission Impossible week certainly gave us many challenges. We had several hula hoop fun challenge games. We had a laser beam challenge that we made when we created "lasers" around the entire pavilion and had to get through them. Our "building" challenge was to build a boat that floats a camper, a marble run, a game, or something "robotic". We think we have a lot of future engineers here at camp! We had a Detective Game which took us all around the club and into the woods to find the clues to unlock the secret code to the treasure box of prizes! We made our own handprint or fossils as well as backpacks to carry our "detective gear". We also had a blast on our Fun America field trip and had a tremendous "flash flood" of rain that turned our GAGA pit and camp into a splash pad – so much fun! We also decided to do 2 "mission" projects all week: collect money & items for an animal shelter and recycle all week. We are pleased to announce we collected over \$50 in donations as well as leashes and collars for a local shelter and recycled over 2 full trash barrels of items we normally would throw in trash. So proud of everyone!! Thank you!

Next Weeks Theme: *Surf UP!* Special Event Wed!
